

Zero-Storage-Cost Backup to OneDrive, Powered by CrashPlan

Leverage Your Microsoft 365 Investment for Enterprise-Grade Backup

Your Microsoft 365 subscription comes with ample OneDrive storage—but are you using it to its full potential? CrashPlan’s flexible storage model gives you dozens of choices for data storage, including the ability to leverage your OneDrive for Business storage as a secure, zero-cost backup destination.

Overcome OneDrive Limitations

It’s tempting to consider OneDrive a viable safeguard against data loss on its own. But sync and share solutions leave your valuable business data vulnerable to deletion, overwriting, or ransomware—without a safe copy to fall back on. That’s why we developed our proprietary integration with OneDrive, which transforms it into a secure, full-fledged backup repository. Eliminate native OneDrive limitations by automatically backing up secure versions of endpoint and Microsoft 365 data, including emails and files in use.

How We Do It

CrashPlan’s patented technology creates a hidden, encrypted backup container within your organization’s unutilized OneDrive storage ensuring business-critical data is protected, immutable, and always recoverable.

- ✔ **Eliminate additional storage costs** by leveraging the storage space that already comes with your OneDrive subscription.
- ✔ **Ensure security and compliance** with end-to-end encryption, data obfuscation, and virtual air-gapping.
- ✔ **Automate backups** from endpoints and Microsoft 365 applications for effortless data protection without user intervention.
- ✔ **Empower IT teams** with centralized control via an intuitive admin console.

Key Features & Benefits

Cyber-Ready Data Protection

End-to-End Encryption

Work confidently, knowing data is encrypted with individual keys and remains encrypted both in transit and at rest.

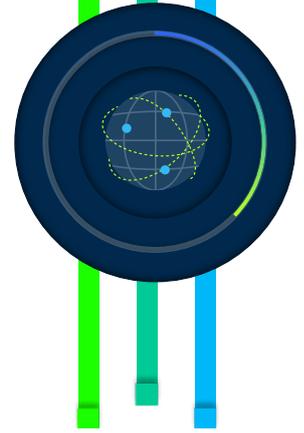

Ransomware Recovery

Identify threats, quarantine files, and rapidly restore data with point-in-time recovery.

Governance and Compliance

Stay compliant, with granular roles and permissions, audit logs, control over retention and storage, and more.

Flexible Deployment & Centralized Management

Policy-Based Backup

Set backup policies for frequency, retention, and exclusions via an easy-to-use console.

Flexible Deployment

Run CrashPlan in our Azure instance, on your on-premises server, or in another cloud of your choice.

Self-Serve Restore

Enable users to recover files independently, reducing IT workload.

Legal Hold and eDiscovery

Place users on legal hold and conduct eDiscovery searches right within the admin console.

Why CrashPlan?

Unparalleled Technology

The only backup solution on the market with flexible backup destination choices that maximize ROI on your existing Microsoft 365 investment.

Endless Scalability

CrashPlan works for enterprises of all sizes and smoothly scales without adding complexity or ballooning costs.

Trusted by IT Teams Worldwide

A proven leader in enterprise data protection and governance for over 15 years user intervention.

“[CrashPlan for Endpoints] is a reliable and cost-effective solution with compelling differentiation that was hard to overlook. We liked their OneDrive integration and the flexibility in their licensing model. We are recommending it to our other groups and subsidiary companies. Their technical support has been great and they're overall a highly responsive and great team to work with. Highly recommend!”

Ramneet Singh, Senior Manger, IT Infrastructure, Panasonic India

CrashPlan provides cyber-ready data resilience and governance in a single platform for organizations whose ideas power their revenue. Trusted by entrepreneurs, professionals, and businesses of all sizes worldwide, CrashPlan's comprehensive backup and recovery solutions ensure the safety and compliance of data without disruption, anywhere at any time.
