SPAMTITAN EMAIL PROTECTION

WHY YOU NEED SPAMTITAN EMAIL PROTECTION

Multi-Layered Email Protection – Advanced Phishing & Malware Blocking

SpamTitan Email Protection protects against email phishing and malware threats. It identifies and blocks new, sophisticated email-borne attacks in real-time using advanced machine learning.

SpamTitan rejects 99.99% of malicious mail with front line tests before reaching customer mail servers. This multi-vector approach scans emails to block phishing threats using:

- Realtime Blackhole Lists (RBLs)
- Recipient Verification
- Sender Policy Framework (SPF)
- DomainKeys Identified Mail (DKIM)
- Domain-based Message Authentication, Reporting and Conformance (DMARC).

Highest Phishing Detection Rates

Exclusive access to multiple best-in-industry anti-spam intelligence feeds to stop phishing attacks.

Advanced Machine Learning

Advanced threat protection using inbuilt auto-learning to recognize new spam, phishing & threat vector patterns.

Recipient Verification

Provides several reinforced methods of recipient verification: dynamic, LDAP, list based and regular expression.

Twice as Effective

Dual anti-virus protection services are run in parallel.

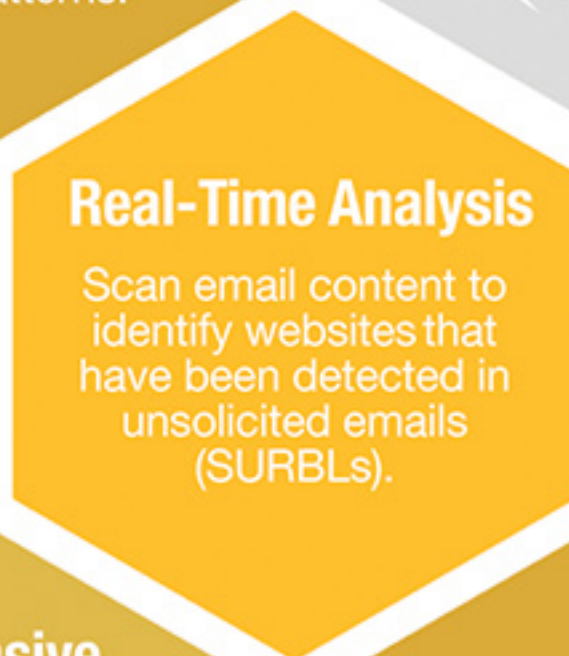

Sandboxing

Robust next generation sandboxing function protects users from advanced threats and attachments.

Real-Time Analysis

Scan email content to identify websites that have been detected in unsolicited emails (SURBLs).

Geoblocking

SpamTitan's Geoblocking restricts senders based on geographical location.

Attachment Filtering

Three-dimensional approach to attachment filtering, to identify safe attachments and either reject or quarantine emails.

Extensive Email Scanning

SpamTitan's content scanning & message filtering enables customers to filtering policies on a per-domain or per-recipient basis.

Innovative Greylisting

Highly effective anti-spam technique identifies large quantities of spam without any impact on a mail server's processing power.

Anti-Spoofing

Instant and highly effective protection against email spoofing such as CEO and email impersonations.
